

Hi Everyone,

Did you notice the beautiful autumn colours this year? The magnificent reds and golds have been stunning. We have been treated to the most wonderful canopy of brilliant red as our ornamental grapevine changed from its summer green to its autumn glow.

I love the subtleties of colour, from the vibrant hues to the most delicate pastels. It brings such a joy to my being. As a silk painter, I become immersed in the colours that I paint and being so passionate about colour, it is not surprising that I was drawn to the shimmering colours of the Aura-Soma colour system.

My journey with silk painting and Aura-Soma were synchronous. One quickly followed the other. I enrolled in the Foundation Course and each night would come home and play on silk as I integrated the colour understandings and information that had been presented during the day.

You are probably passionate about colour also. Those who are, tend to be immediately drawn to the wonderful colour combinations in the Aura-Soma Equilibrium bottles. I remember being like a child at Christmas time. Each bottle seemed to hold a gift and I could not wait to discover what it was.

My journey with Aura-Soma has taken me around the world, including seven years spent at the home of Aura-Soma in Tetford, a little village in the Lincolnshire Wolds where I was course director of the Aura-Soma residential training establishment known as the Art & Science International Academy of Colour Technologies (aka the AS I ACT Academy)

It was during my Level 1 Foundation course that I discovered that I had an intuitive and innate knowing of colour. You do too – we are all vibratory beings, radiant beings of light.

Colour, of course, is vibration and light. It is who we are.

I was very fortunate to meet another lady who was also very passionate about colour. She had been working in the personal development field in excess of 15 years when I met her. She has become a very close and dear friend and we now teach Aura-Soma together. Some of you have already met her at fairs and exhibitions or spoken to her on the phone. Her name is Jenette Youngman. She was one of the first fully trained Aura-Soma teachers in the world as well as here in Australia. Together, we present all levels of the Aura-Soma training system.

The Level 1 course is an introduction to the whole of the Aura-Soma colour system. Birthed by Vicky Wall in 1983, Aura-Soma is now in 50 countries around the world so Vicky's vision is manifesting as she predicted. This year we celebrate its 25th birthday.

In July, Jenette and I will be presenting a **Level 1 Foundation course** together over two three day weekends, and we would love you to join us.

The first weekend will be held **Friday 18th to Sunday 20th July**, and conclude the following weekend **Friday 25th to Sunday 27th July**.

As someone who has been in touch with us about Aura-Soma classes, we would like to offer you this course for the **special price of \$690.00** – a **saving of \$85.00** on our normal price. Student materials and workbook are included in this price.

Many of you are already using some of the Aura-Soma products so you are aware of the benefits that this system has to offer. Why not come and join us on this course and deepen your journey of understanding.

For those who have not had the chance to try the products yet, we have a full range of Pomanders, Quintessences and Archangeloi available for classroom use on our course. It is a great way to sample everything as **you** begin to choose what will support you best in your journey towards self understanding and increased awareness. Within Aura-Soma we have a saying: 'You are the colours you choose and these reflect your being's needs'

If you would like to join us for this course, please complete the accompanying Enrolment Form and return to us by **July 5th** to ensure your place.
